

## Computer Physics Reports

### Contents to Volume 9

D.C. Rapaport, Large-scale molecular dynamics simulation using vector and parallel computers . . . . .	9 (1988) 1
F.H.M. Faisal, Floquet-Green's function method for radiative electron scattering and multiphoton ionization in a strong laser field . . . . .	9 (1989) 55
W.E. Pickett, Pseudopotential methods in condensed matter applications . . . . .	9 (1989) 115
J. Makino and P. Hut, Gravitational <i>N</i> -body algorithms: a comparison between supercomputers and a highly parallel computer . . . . .	9 (1989) 199
P. Claverie, A. Denis and E. Yermian, The representation of functions through the combined use of integral transforms and Padé approximants: Padé-Laplace analysis of functions as sums of exponentials . . . . .	9 (1989) 247
M.P. Allen, D. Frenkel and J. Talbot, Molecular dynamics simulation using hard particles . . . . .	9 (1989) 301
